

**SECRET**

DDI/NPIC

DDI-1774-65

Points to be Covered in 15 Year Outline

1. Photography

- a. Increasing volume over current areas of continuing interest.
- b. New photographic inputs covering world areas not now of major intelligence interest.
- c. Higher resolution giving more detail and providing aid to a wider variety of intelligence problems.
- d. Increasing demands for photographic interpretation in support of arms control activities.
- e. Increasing use of photography [REDACTED]

g. Increasing use of photography for non-intelligence purposes but for which NPIC may well have to lead in the establishment of an unclassified national resources center.

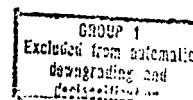

2. Other Imagery

- a. Radar, [REDACTED] other sensors to provide all-weather, day and night capability.
- b. Continuing surveillance.
- c. Combination of photographic and other sensors providing multiple readout reports and products.

3. Near Real Time Readout

- a. Remote TV and other "Dumping" systems for almost real time readout.
- b. Multi-sensor, real time readout providing capability in indications and current intelligence business.

**SECRET**

SECRET

4. Resources

- a. Increasing demands for greater numbers of and more highly skilled and trained personnel.
- b. Significantly rising costs of operations and research and development.
- c. Heavy emphasis on computer and other electronic machine assistance.
